

## In this Chapter:

- Design and installation requirements of LP Gas systems.
- LP Gas usage in flame shows and food trucks.
- Safety requirements for LPG usage and re-filling

## Intent of the Chapter

- To lay down the technical requirements for design and installation of LPG cylinder and central gas systems as per best practices.
- To lay down the requirements for safe handling of LP Gas.
- To ensure material and equipment involved in LPG installation are tested and comply with international standards.
