

## In this Chapter:

- ➔ Definitions of fire detection, alarm equipment, and systems.
- ➔ Specifications and design consideration for various fire detection and alarm systems.,
- ➔ Installation, commissioning, maintenance of fire detection, and alarm systems.

## Intent of the Chapter

- To provide means of detecting smoke, heat, flame, fire and provide means of alarming the occupants at the earliest.
- To provide minimum design, installation, commissioning and maintenance requirements for the fire detection and alarm systems.
- To establish and maintain equipment and material quality.
